

CAPE COD

The Power of Beauty

Cape Cod has been designed to satisfy the most sophisticated awning demand for classical lateral arm features and advanced technology combined. Its result is a compact cassette protecting its fabric when totally retracted and a slick glossy and elegant frame extending a few inches from the wall with absolute no need for winter storage.

Available in three standard classy color finish, white, cream, and brown or in any color on demand, Cape Cod dresses perfectly with the selection of any colorful fabric, and offers an elegant discrete design to enhance the beauty of any house.

When fully open, Cape Cod extends its shade to any outdoor area on command and protects you and your family from the direct effects of UV sunrays.
