

MADERA GIANT

Alutex Awning Systems. Everything else... is just shade.

Madera Giant is a double square bar lateral arm extra heavy-duty offering the same versatility of any classical retractable lateral arm awning. With its superior structural strength and projections up to 20' (the largest today on the market), Giant is installed with two brackets per arm (13" high) and an extra center bracket to maintain the alignment of its two back square bars.

Although minor projections (15' and 16') can be installed on regular sidings by using the appropriate installation board, reinforced concrete and/or cinder block siding are highly advised for larger projections.

Thanks to its impressive strength Giant's front clearance can be minimum even with its largest projections (i.e. 2' on 20' projection).

Giant aluminum frame is offered in white powder coated finish, stainless steel hardware and chained elbows. Custom color frames are available upon request.

Product Features

- Width Range 18' to 40' (1/4" increment)
- Projection Range 15', 16', 17', 18', 19', 20'
- Side size w/Hood 13" H x 12" W
- Side size w/out Hood 13" H x 12" W
- Hood Yes (optional)
- Hood Shape 11" Round
- Control Motorized (Gear not advised)
- Installation Option Wall, Roof Mounted
- Bracket Size 13" H x 6" W x 1 1/2" D
- Standard Pitch Control Bolt Lock System
- Crank Pitch Control N/A
- Drop Down Valance Yes (optional)
- Fabric Option Over 300 acrylic fabric patterns
- Leg Kit Yes (optional)
- Standard Color Frame White
- Custom Color Frame Any (on request)
- Frame Warranty 10 Years

CAUTIONARY AND IMPORTANT OPERATING INFORMATION: Retractable Awnings contain strong springs under tension. Retractable awnings are specifically designed to be retracted under inclement weather conditions and be used primarily for sun protection. They are not designed to withstand high winds, heavy rain or snow. During those times, awnings must be fully retracted to prevent damages not covered by warranty.
