

Alutex Awning Systems. Everything else... is just shade.

When completely rolled up, Capri can rest discretely above your window. When rolled out, its spring-loaded arms conveniently reach any desired position in a matter of seconds, making this retractable awning the ideal response to high noon or low afternoon sun. If provided with extra fabric, Capri can also be lowered 180 degrees down for total window privacy.

Created to dress small or large windows, this drop arm retractable awning is easy to install and operate, and it is the modern response to rectangular stationary awnings.
